This action is in response to applicants' amendment of 23 May 2003. The 35 USC 102 rejections are withdrawn and the 35 USC 112 rejections is withdrawn due to the amendments to the claims. The objection to the specification is withdrawn due to the amendment to the specification. The 35 USC 103 rejection over JP 51-126,986 is withdrawn due to the amendment to the claims. Applicant's arguments with respect to the remaining rejection have been fully considered but they are not persuasive.

EP 89,109 has been considered, with respect to the discussion of this reference given in the specification.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown.

This reference teaches a substrate treating solution for imparting hydrophobicity to the substrate comprising an aqueous solution of an alkali metal silicate and an alkali metal alkyl siliconate. Run numbers 7-9 teach aqueous compositions containing 1.25 wt% sodium silicate and 0.25 wt% sodium methyl siliconate; 2.5 wt% sodium silicate and 0.5 wt% sodium methyl siliconate and 5 wt% sodium silicate and 1 wt% sodium methyl siliconate. The composition falls within the claimed range. Column 5, lines 40-55 teach the composition contains 0.1-10 wt% siliconate and 0.1-30 wt% silicate. These amounts overlap the claimed ranges. Product claims with numerical ranges which overlap prior art ranges were held to have been obvious under 35 USC 103. *In re Wertheim* 191 USPQ 90 (CCPA 1976); *In re Malagari* 182 USPQ 549 (CCPA 1974); *In re Fields* 134 USPQ 242 (CCPA 1962); *In re Nehrenberg* 126 USPQ 383 (CCPA

1960). Since the weight percentages overlap, one of ordinary skill in the art would be expected to expect the molar ratios to also overlap, absent any showing to the contrary. The reference suggests the claimed composition. Since the claimed and taught composition overlap, one of ordinary skill in the art would expect the taught composition to have the claimed property of claim 19 in the overlapping range and to have a composition that overlaps that of claim 18.

Applicants' arguments are that the composition of Brown is not used as an agricultural soil treating solution. The intended use of composition is not patentably significant. *In re Albertson* 141 USPQ 730 (CCPA 1964); *In re Heck* 114 USPQ 161 (CCPA 1957). The rejection is maintained.

Claims 6 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-30 are allowed.

There is no teaching or suggestion in the cited art of record of the claimed aqueous solution of an alkali metal silicate and an alkali metal alkyl siliconate which further comprising a coloring agent and/or an agrochemical principle.
